PROFESSIONAL SUMMARY

AI Engineer with hands-on experience building, analyzing, and deploying machine learning and NLP systems through industry-mentored remote internships and academic research. Strong foundation in Python, deep learning (CNNs, LLMs), OCR, sentiment analysis, and data-driven problem solving. Experienced in end-to-end AI workflows including data preprocessing, model development, evaluation, documentation, and ethical considerations. Proven ability to work independently in remote environments while delivering structured, high-quality technical outcomes aligned with industry standards.

EDUCATION

DAKSH GURUKUL, IIT GUWAHATI

Credit – Linked Program in AI/ML

Remote/Online
Mar 2025 – Mar 2026

AMITY UNIVERSITY ONLINE

Bachelor of Computer Applications (BCA) – Data Analytics (TCS iON)

Remote/Online.
Jul 2022 - Jul 2025

- Data analytics–focused curriculum delivered in collaboration with TCS iON, covering statistics, SQL, Python, and applied analytics in a fully remote format..
- Demonstrated strong self-discipline and remote adaptability through consistent use of virtual platforms, and asynchronous collaboration tools.
- CGPA: 8.31

WORK EXPERIENCE

TCS iON RIO 210 – PROGRAM

AI Intern

Remote
Sep 2025 – Dec 2025

Project: *Automated Sentiment Detection & Overall Sentiment Prediction*

- Built an end-to-end NLP pipeline to classify paragraph-level sentiment using Python and ML techniques, processing 1,000+ text samples with structured preprocessing and evaluation.
- Improved sentiment prediction reliability by analyzing misclassification patterns and refining feature selection and scoring logic.
- Delivered the project within a 210-hour industry-mentored timeline, demonstrating strong ownership, time management, and remote execution discipline.

TCS iON, RIO 125 – PROGRAM

AI Intern

Remote
Mar 2025 – May 2025

Project: *Automated Handwritten Text Extraction System*

- Developed an OCR pipeline using **OpenCV and Tesseract OCR** to extract handwritten text from images with improved readability and accuracy.
- Identified and analyzed **key OCR failure causes** through error distribution analysis, enabling targeted preprocessing improvements.
- Implemented image preprocessing techniques (thresholding, noise reduction) to enhance text extraction performance..

EDUNET FOUNDATION (Tech Saksham)

AI/ML Intern

Remote
Nov 2024 – Dec 2024

Project: *DRSTIGYAN – Image Classification System*

- Built a custom **CNN model in PyTorch** for CIFAR-100 image classification, achieving **87% validation accuracy**.
- Designed and trained the model using optimized data pipelines and hyperparameter tuning for improved generalization.
- Received an official **invitation to showcase the project at OpenCV Expo 2024 (Ready Tensor)** based on technical merit.

PROJECTS

AGENTIC AI: EXPLORING THE RISE OF AUTONOMOUS AI AGENTS

Final-Year BCA Research Project

Apr 2025

- Analyzed **task chaining, memory modules**, and **LLM-based autonomy** using tools like **LangChain** and **Auto-GPT**; contributed to a report predicting **45% future task automation use cases**.

AUTOMATED HANDWRITTEN TEXT EXTRACTION SYSTEM

AI Internship Project (TCS iON, RIO – 125 Program)

Mar 2025

- Identified key causes of OCR failure using error distribution patterns.

DRSTIGYAN (IMAGE CLASSIFIER)

AI/ML Internship Project (EDUNET FOUNDATION)

Nov 2024

- Created a custom CNN model for CIFAR-100 image classification using PyTorch, with 87% validation accuracy.

KEY POINTS

- Delivered **3 industry-mentored AI projects** across NLP, OCR, and Computer Vision with measurable outcomes and documented results.
- Applied **end-to-end ML workflows**: data preprocessing, model development, evaluation, error analysis, and reporting.
- Demonstrated strong **remote execution discipline**, meeting deadlines across **300+ total internship hours**.

ADDITIONAL

Technical Skills Proficiency –

- **Programming Languages**: Python, C, SQL
- **Data Tools**: Excel, SQL (Basic–Intermediate)
- **ML Frameworks & Libraries**: PyTorch, TensorFlow, Scikit-learn, OpenCV, Tesseract OCR, Pandas, NumPy
- **Tools & Platforms**: Git, Jupyter, Google Colab, Streamlit, Flask, MATLAB
- **Key Concepts**: Neural Networks (CNN, LLMs), Causal Inference, OOP, Time Series, Optimization, Reinforcement Learning, Model Deployment
- **Big Data (Basic)**: Apache Spark, Hadoop (familiarity through projects and courses)
- **Technical Comfort**: Fast learner of new CRM and customer success platforms
- **Soft Skills**: Creative Problem Solving, Adaptability, Communication, Attention to Detail, Active Listening, Team Collaboration

Languages: English (Fluent), Hindi (Fluent)

Certifications & Training: Generative AI Program (Bertelsmann / Udacity), Google AI Essentials (Coursera), Career Essentials in Generative AI by Microsoft and LinkedIn (Microsoft)

Invitations: Received the prestigious invitation to showcase the **DRSTIGYAN** model at Open CV Expo 2024, hosted by Ready Tensor.
